

Transition Asia joins Japan Climate Leaders' Partnership ("JCLP")

1 Oct 2025 - Hong Kong - Transition Asia announced today that the organisation has joined the Japan Climate Leaders' Partnership ("JCLP"), a coalition of 233 companies committed to climate action, as a supporting member.

Since its founding in 2021, Transition Asia has made Japan one of its geographical focus areas, publishing more than 40 reports on high-emission sectors to track their decarbonisation progress and provide stakeholders with technical insights for informed decision-making.

Transition Asia also conducts climate-focused discussions with stakeholders including corporates, investors, policymakers and downstream players to understand their needs and concerns on low-carbon procurement and to collaborate on meaningful decarbonisation action.

By becoming a member of JCLP, Transition Asia aims to deepen collaboration with Japanese stakeholders and provide robust data analysis and modelling to support sustainable, low-carbon transitions and progress towards a 1.5°C pathway.

About Transition Asia

Founded in 2021, Transition Asia is a non-profit think tank dedicated to accelerating decarbonisation in Asia's materials and heavy industries to achieve the 1.5°C climate goal. Our multidisciplinary team combines diverse perspectives, experience and expertise, underpinned by a strong research foundation in Asia and a nuanced understanding of the region. Using analytical models and in-depth assessments, we evaluate and monitor corporations' decarbonisation efforts and actions. By engaging with stakeholders across sectors—including corporates, investors, policymakers and civil society organisations—we facilitate informed and impactful discussions that drive sustainable, low-carbon transitions aligned with a 1.5°C future.

About JCLP

On the basis of the recognition that the industries should have a healthy sense of urgency and start taking proactive actions, JCLP was established in 2009 as a Japan-unique corporate group. As of at the end of September 2025, 233 companies including Japanese leading businesses from a wide range of industries have memberships. The total sales of member companies is approximately JPY 138 trillion and the total volume of electricity consumption is approximately 75 TWh (an estimation for reference including overseas operations).

For realisation of the decarbonised societies, JCLP is driving collaborations with local governments and foreign organisations while being the focal point for dissemination of RE100, EV 100 and EP100 as a local partner of The Climate Group, a global NPO.
